

Requested Patent DE19812966A1

Title: SMALL BRUSHLESS DC MOTOR ;

Abstracted Patent: DE19812966 ;

Publication Date: 1999-09-30 ;

Inventor(s): ESSIG RUEDIGER (DE); KOLLER PETER (DE) ;

Applicant(s): KOLLER PETER (DE) ;

Application Number: DE19981012966 19980324 ;

Priority Number(s): DE19981012966 19980324 ;

IPC Classification: H02K29/06; H02P6/10; G05B23/02 ;

Equivalents: ;

ABSTRACT:

The motor has a rotor position detector, and control circuitry which is directly coupled to the mechanical components of the motor. A memory stores the individual properties of the rotor position detector for the motor concerned. A correction unit corrects the position signal from the position detector based on the properties of the detector. A method of manufacturing a brushless DC motor is also claimed.
